The request filed on 12/15/2009 for a Request for Continuing Examination (RCE) under 37 CFR 1.114 is acceptable and an RCE has been established. Any previous finality is hereby withdrawn and a new action on the merits follows. Any newly-submitted claims have been added. An action on the RCE follows.

The status of the claims is as follows:

Claim 2 has been cancelled; and

Claims 1, and 3-6 (4-6 newly added) are herein addressed below.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the substantially curved trajectory including several curves with corresponding changes in curvature without points of inflection as recited in claim 1, lines 9-10, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claims 1 and 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 7, the phraseology "angle of departure is between +45 degree and -45 degree" is not readily understood by the Examiner. Specifically, what is meant by "angle of departure"?

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-6 are further rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi et al. (4,633,613) in view of Bickerstaff (4,589,227). As shown in Figure 10, Kobayashi et al. (4,633,613) discloses an operating device comprising a slider (58) joined (60 and 62) to a window (18) which slides along a guide rail (54) having a substantially curved trajectory including several curves (more than

two) without points of inflection. Kobayashi et al. (4,633,613) fail to disclose an adjusting means to position the device. Bickerstaff (4,589,227) discloses adjusting means (oblong slots on the top and oblong slots on the bottom. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the operating device of Kobayashi et al. ('613) with adjusting means as taught by Bickerstaff (4,589,227) since an adjusting means allows the device to mounted under less tolerances.

Applicant's arguments with respect to claims 1 and 3-6 have been considered but are moot in view of the new ground(s) of rejection.
